

Addressing the SDGs through Collaborative Online Learning at Antonio Nariño University (UAN)

Angela Jackson M.

Antonio Nariño University (UAN)

Colombia

Antonio Nariño University (UAN) is committed to integrating the Global Development Agenda into its academic programs by implementing COIL (Collaborative Online International Learning) and promoting partnerships with local institutions for sustainable development. Through two key initiatives, Ingenio City/Creative City and the SDG principle “Leave no one behind”, UAN addresses local environmental challenges by uniting interdisciplinary groups of students and professors and organising conferences on best practices and projects aligned with the Sustainable Development Goals. These initiatives represent a collective learning space that fosters well-being and increases the participants' awareness.
