

Education for Sustainability: A Pedagogical Roadmap

Mennatallah Gawayed, Nancy Abou Youssef & Haidy Mahmoud Shehata
Pharos University in Alexandria, Egypt

Pharos University in Alexandria (PUA) is committed to becoming a leading Green Campus in the region. By adopting a pedagogy for sustainability, the university aims to fulfil most of the 17 SDGs. The initiative "Green PUA" employs a variety of approaches, including the 5Cs model for sustainability development in HEIs, embracing cultural shifts, incorporating SDGs into the curricula of different faculties, collaborative interdisciplinary research, and international partnerships. The university's international collaborations have accredited several staff members with professional diplomas in education for sustainability to extend to communities nationwide. "Pharos Sustainability Center" aims to build sustainability channels between staff from different disciplines, in resources, research, and education, creating the "6thC" of the 5Cs model. PUA is proud of its recognition in the Times Higher Education Impact Ranking system for five consecutive years, reflecting its ongoing commitment to sustainability.
